 **Монитор последовательного интерфейса** ushbu butonni bosganingizda serial port ochiladi. Serial port arduinoga kirayotgan ma'lumotlarni kompyuterda o'qib olishimiz uchun ajratilgan port hisoblanadi.

**6.5-rasm**

Bu yerda arduinoga yuborilayotgan **1017** qiymatini ko'rishimiz mumkin. Analog signalda **0-1023** gacha qiymatda yuboriladi. Agar **1017** qiymat yuborayotgan bo'lsa, demak, qorong'i bo'layotgan bo'ladi. Buni simulyator yordamida ko'ramiz.

**6.6-rasm.**
